

Seeking Project Engineering Wizard!

Landia, Inc. is seeking an enthusiastic Mechanical Engineer with a passion for solutions to join our fantastic team in Cary, North Carolina. This is NOT your typical engineering job, where you'll be stuck in a cubicle doing repetitive tasks. Rather, this is a multidisciplinary position, suitable for a true team player, who is up for a challenge.

If you thrive in a dynamic team-oriented work environment, and if you can handle a boatload of responsibility, as well as juggle multiple projects without losing attention to the details, then we have the perfect job for you!

Key Competencies

- Interest and ability to learn, retain, and use new knowledge
- Strong mechanical understanding
- Attention to detail and accuracy
- Verbal and written communication skills
- Creativity and 'out of the box' thinking
- Team player

Job brief

As Project Engineer at Landia, Inc. you will be part of a dynamic team of professionals, who service a wide range of clients throughout the country. The role of the Project Engineer is to educate customers and consultants on the products and solutions that Landia offers. You will support the network of Landia manufacturer's representatives in promoting, specifying, selling, and commissioning our products.

You will be responsible for preparing technical specifications, shop drawing submittals, and provide engineering support for a variety of projects. You will provide technical support to the Regional Sales Managers and participate in price quoting, order reviews, and other parts of the equipment sales process.

Please email sbr@landiainc.com for an application form or in writing and enclosing your CV and salary requirement to:

www.landiainc.com

Landia, Inc. is a U.S. sales and service organization, which is part of the family-owned company Landia A/S, headquartered in Denmark. We manufacture equipment for the renewable energy and wastewater treatment industries. We have over 80 years' experience in manufacturing the highest quality, most reliable mechanical equipment on the planet.

The flat organizational structure at Landia, (which is quite typical of companies from Denmark), offers the ideal work environment for self-motivated, independently-thinking, responsible employees, who take pride in delivering their very best each day, every day. We are dedicated to providing the optimum products and services to our customers – because we care!
