

Stainless steel Chopper Pump for dry installation

Ideal for comminution and pumping of difficult mediums

Especially suited for pumping of e.g. sludge, pulp and wastewater with coarse solid parts. Numerous application possibilities at e.g. wastewater treatment plants and abattoirs and within the paper and fish industry.

Landia pump type MPTKR-I medium pressure

- Pump casing and impeller of acidproof stainless steel.
- Specially designed impeller for difficult mediums.
- Guide traces in the pump casing ensure that no dry matter particles are "caught" in the pump.
- Available with knife system.
- Equipment for mounting in existing installation.
- Available with explosion proof motor.
- Horizontal or vertical mounting.
- Motors ranging from 4.9 to 30.2 HP.

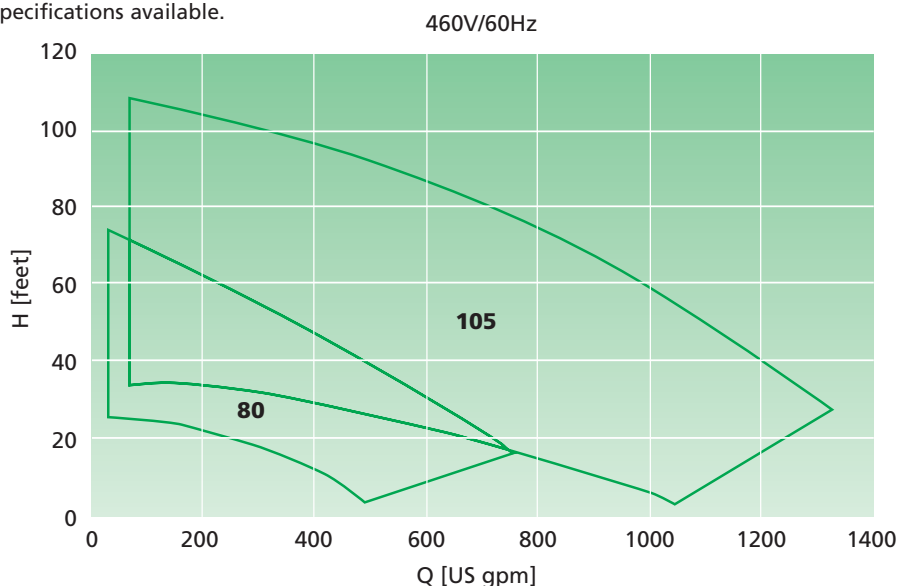

Quality in every detail

MPTKR-I medium pressure

Performance and data: (Valid in water)

Article no. (460V)	Description	Motor power HP	Consumption at 3x460V amp.	Dimensions HxWxL	Weight lb
2524203	MPTKR-I 80	4.9	6.5	17x15x23"	177
2524204	MPTKR-I 80	6.5	8.9	17x15x24"	187
2524205	MPTKR-I 80	9.0	11.5	17x15x25"	220
2524907	MPTKR-I 105	12.2	15.0	21x18x27"	348
2524911	MPTKR-I 105	17.9	20.5	21x18x29"	392
2524915	MPTKR-I 105	24.5	28.0	21x18x29"	480
2524918	MPTKR-I 105	30.2	33.0	21x18x29"	502

Motor: 3-phased AC motor 60Hz. Voltage: 460V, 1800 rpm.
Different motor specifications available.

IMPORTANT: The pump is designed for dry installation and it must be placed in accordance with this.

Material:

Pump casing and impeller: Acidproof stainless cast iron AISI 316C16

Knife system: Acidproof, steel hardened

For correct sizing please supply us with the following information:

- purpose of application
- medium
- required perform./pressure
- d.m. content
- length of piping
- diameter of piping
- total head
