

Cost saving dry pit LANDIA pump installation.

Landia motor pompe type MPTK

Many advantages can be achieved by applying a dry installed motor pump in a PE-pit in connection with vacuum evacuation pig slurry systems:

- no slurry reception pit with odour problems
- no siphon
- numerous channels can be connected to one pump
- pump enhances vacuum effect during evacuation
- packaged solution with valves, no concreting, easily installed and connected
- extended bottom base plate eliminating the risk of the pit being lifted out of the ground due to high water base or floods

Extras: valves and de-airing pipe.

LANDIA slurry pump in dry pit installation

Illustration of a typical installation of a Landia type MPTK dry installed pump for efficient slurry evacuation and pumping from channels to storage tank.

- Ask us for professional advice for packaged pumping systems that are friendly to the environment, free of bad odours, easy and quick to install.
